Languages: Spanish - Native | English - Professional proficiency (TOEFL ITP) | Japanese - N4 | German - Limited proficiency

PROFESSIONAL SUMMARY

Senior software engineer with experience in full stack development, backend systems, APIs, and distributed integrations. Involved in solution design, technical definition of features, service-to-service integration, incident analysis, and product evolution. Experience supporting development teams through technical reviews, troubleshooting, work delegation, and translating functional requirements into implementable solutions.

PROFESSIONAL EXPERIENCE

Full Stack Developer | APPWHERE / Scitum — TELMEX

Jun. 2024 - Present

- Contributed to a cybersecurity platform for TELMEX, building dynamic views and modules with React, JavaScript, and TypeScript, including custom menu configuration, persistence, and backend integration.
- Built interactive web applications with Blazor, Razor Components, and MudBlazor using C# and .NET 8, creating reusable components and integrating REST APIs.
- Developed and resolved incidents in banking APIs and microservices supporting internal, external, and hybrid integrations in distributed environments.
- Validated API contracts, request/response models, headers, authentication tokens, authorization flows, error handling, and data persistence to keep integrations secure and reliable.
- Investigated complex issues using API traces, application logs, SQL queries, Postman tests, database validation, and root-cause analysis.
- Worked with REST and SOAP services, token-based authentication, API gateways, service-to-service integrations, SQL queries, stored procedures, Git, Azure DevOps, and CI/CD pipelines.
- Contributed to architecture improvements using Clean Architecture, SOLID, dependency injection, design patterns, and separation of concerns, and supported developers through technical guidance, troubleshooting, code reviews, and solution design.

Full Stack Developer | Upax Grupo Salinas

Jun. 2023 - Jun. 2024

- Developed and supported TV, Android, web, and backend applications across Tizen, Android, and web environments.
- Built enterprise applications and interfaces with Blazor, Razor Components, MudBlazor, C#, and .NET, creating dynamic, reusable views focused on consistent UX.
- Implemented and customized MudBlazor components and reusable Razor Components integrated with REST APIs and .NET backend services.
- Supported cloud and operational environments using AWS, Azure, IIS, and Windows Services, and contributed to C++ development, technical documentation, and version control with Git and Gogs.
- Supported developers and teammates with technical troubleshooting and application support across multiple platforms and technologies.

Software Engineer | Samsung Electronics - Samsung

Apr. 2022 - May 2023

Research Tijuana (SRT)

- Tested, supported, and contributed to TV and Android applications for Tizen and Android, including product launches in the United States and LATAM.
- Led metadata research for an IoT application and collaborated on the design and implementation of metadata features.
- Served as Technical Account Manager (TAM), gathering partner requirements, coordinating scope and timelines, supporting releases, and resolving implementation issues.
- Collaborated with partners, developers, and technical teams to identify requirements, resolve incidents, and deliver applications successfully.
- Worked with .NET/.NET Core, Entity Framework, LINQ, HTML5, CSS, Vue.js, MagicINFO, Knox, and AWS services including EC2, RDS, Lambda, CloudWatch, and API Gateway; supported a database migration to Zoho CRM.

PROFESSIONAL EXPERIENCE - CONTINUED

- Backend Developer | Mezcal Espina Negra

May 2021 - Apr. 2022

 - Developed internal web applications, backend services, and APIs with C#, .NET, ASP.NET, and JavaScript, including SQL Server queries and operations.
 - Developed and consumed REST APIs, with testing, integration validation, and debugging in Postman.
 - Supported IIS, Windows Services, Bootstrap, and Angular, and resolved backend and operational incidents.
- Full Stack Developer | Holazo Sports

Jan. 2020 - Jul. 2021

 - Developed full stack web applications with JavaScript, C#, Ruby on Rails, and Tailwind CSS, including REST APIs and backend services.
 - Administered IIS, SQL, and servers for production environments, including database administration tasks.
 - Handled data migrations, query and performance optimization, technical documentation, and integration validation with Postman.

CONSULTING AND SOFTWARE PROJECTS

- Remote collaboration with clients and teams in the United States, including meetings, requirements analysis, technical documentation, and professional communication in English.
- The Job Duck — Talent Community | Duration: 1 year 4 months

 - Developed and evolved Talent Community, contributing to full stack features, backend services, web interfaces, data persistence, and system integrations.
 - Built serverless processes with Azure Functions and Azure Blob Storage for automation, asynchronous processing, and data synchronization.
 - Helped migrate processes from a monolithic architecture toward an event-driven approach, decoupling tasks and improving information processing.
 - Designed and implemented AI data-processing flows, pipeline automation, and optimization of models used in the product.
 - Built integrations with Salesforce, Workday, REST APIs, and internal services for data exchange and synchronization.
 - Developed dashboards, SQL queries, stored procedures, and Entity Framework data access, plus task automation and Azure pipelines.
- Legerity Services — Squirell Project | Duration: 6 months

 - Maintained and evolved legacy applications, including support, incident resolution, and delivery of new features and services.
 - Developed and modified backend services, SQL queries, and stored procedures, adding new logic on top of existing systems.
 - Implemented file intake and processing through APIs, classifying received information and storing it by user for later retrieval.
 - Participated in deployments, validations, and releases across QA, Staging, and Production.
 - Analyzed existing code and processes to add new functionality while keeping compatibility with legacy applications and services.

TECHNICAL SKILLS

- Technical leadership:** Mentoring developers, coordinating technical work, delegating tasks and projects, code review, translating product requirements into technical solutions, and unblocking teams
- Software architecture and design patterns:** Clean Architecture, SOLID, dependency injection, CQRS, Repository Pattern, Unit of Work, Factory Pattern, MVC, modular design, separation of concerns, scalable and maintainable system design
- AI and intelligent solutions:** LLM integration, AI model integration, prompt-based processing, speech-to-text, transcription processing, AI skill extraction, model orchestration, AI APIs, intelligent automation, AI-enabled workflows
- Cloud, serverless, and distributed systems:** Microsoft Azure, Azure Functions, AWS, EC2, RDS, Lambda, CloudWatch, API Gateway, serverless processing, distributed integrations, scalable backend services, observability, production troubleshooting
- Backend and programming languages:** C#, .NET, .NET Core, ASP.NET, ASP.NET Core, Java, Spring Boot, Python, JavaScript, TypeScript, C++, Ruby, PHP, Entity Framework, EF Core, LINQ
- APIs, integration, and security:** REST, SOAP, GraphQL, JWT, Bearer tokens, API keys, Swagger/OpenAPI, authentication and authorization, contract validation, service-to-service communication, hybrid integrations, Postman, Apigee, MuleSoft
- DevOps, testing, and observability:** Azure DevOps, Git, CI/CD, Docker, IIS, Windows Services, Gogs, unit testing, integration testing, logging, telemetry, application monitoring
- Databases and data:** SQL Server, MySQL, stored procedures, database migrations, query optimization, performance tuning
- Frontend and frameworks:** React, Blazor, Razor Components, MudBlazor, Vue.js, Angular, HTML5, CSS, Bootstrap, Tailwind CSS, Telerik UI

CERTIFICATIONS

- Claude Certified Architect - Foundations | Anthropic
- Issued: Aug. 2026 | Expires: Aug. 2027 | Credential ID: cb87fb03-322e-4ee3-974c-297075f43d14

EDUCATION

- Master's Degree in Innovation Project Management (In Progress)

Start: Oct. 2026

Universidad Tecnológica Latinoamericana en Línea (UTEL)
- Computer Systems Engineering

2022

Tecnológico Nacional de México, Campus Oaxaca
- Technical Diploma in Graphic Design

2015

Computación del Golfo Oaxaca
- IT Technician

2015

Computación del Golfo Oaxaca
